Sizing chart notes:

• The offset range is set in 1mm increments. Example: A BIG CALIPER (R-DISK) 19x9.5 is available in a +48 offset through a -32 (negative 32) offset. Therefore, available offset for that spec are a +48, +47, +46...through a -30, -31, -32.

• The number in () is the lip size (also known as rim depth). Example: A 19x9.5 +63 (47mm) means the offset is a +63 with a lip size of 47mm.

• Available center disk types (in order from most brake clearance to least brake clearance) : Big Caliper (R-Disk), Standard (A-Disk), Deep Rim (O-Disk). Please check with us if you are unsure what center disk is required for your vehicle's brake system.

• If you have any question regarding wheel fitment for your vehicle, please contact us directly via email sales@workwheelsusa.com). Please include your vehicle's year/make/model and current brake system (OE or aftermarket).
